CABLE AIRPORT MUSEUM AND EVENT CENTER

We are very excited that progress is being made. We have been talking about this for awhile now but we can officially say the architectural drawing you see was submitted to the City for approval. So what this means is that we may move forward on getting permits to build. The City has already approved the preliminary concept so this is the next step in being able to put the project out to bid. In addition, the Airport will be getting two FAA grants to redo the main parking lot including creating the parking lot to support the building. This is very exciting for the Airport.

DC Flight Simulation, continues to raise the bar for flight training support with the addition of cutting-edge smart whiteboard technology, expanded medical services, and a structured mock check ride program, and the only 24/7 access facility in the country where you can bring your own CFI. The newly installed smart whiteboards in DC Flight Simulation's briefing rooms now allow instructors to seamlessly integrate interactive tools into their lessons. These advanced boards feature internet connectivity, real-time annotation over any displayed content, unlimited whiteboard space, and full session recording—capturing both screen activity and in-room audio. Lesson recordings can be shared directly to students' devices, offering an invaluable resource for post-briefing review.

In partnership with Dr. Dai Tran, an on-site FAA-designated Aviation Medical Examiner (AME), DC Flight Simulation now offers second and third class medical exams, with first class certifications anticipated later this year—making it easier than ever for pilots to stay current without leaving the airport for AME information please contact Dr. Tran at 850-867-1147.

For more information or to schedule a session, visit www.dcflightsimulation.com or contact us at 909-816-5885.

May 5 - June 30
\$15 Per Person
(2 Years and Under Free)

GENERAL ADMISSION
Begins July 1
\$20 Per Person

Register early for more chances to win free onsite parking!
Accessible parking available, call for more details

SCHEDULE

5:00 P.M.
Gates Open
Live Band & Stage Contests
Games & Crafts
Various Food Vendors

9:00 P.M.
Fireworks Spectacular

FOR MORE INFORMATION PLEASE CALL (909) 981-4501 OR VISIT WWW.UPLANDCA.GOV/4TH-OF-JULY-FESTIVITIES

Fireworks Spectacular Here at Cable

The 4th of July is a month away! For our tenants the Light Up the Night event will be the same as last year with a couple of minor changes. If you would like to view the event from your hangar, each lease holder will be allowed to get themselves and one person in with their gate card. Each lease holder can also get two more passes in the airport office for anyone else they would like to attend. If you would like to attend the Light Up the Night event on the south side of the field you will need to purchase a wristband to gain entry into the event. If you purchase online, you will exchange your purchase receipt at the Dewey Way gate for a wristband or you can directly purchase wristbands in the Airport Office. Just like the past couple of years our tenants will only enter the airport at the Dewey Way gate after 2pm and the gate will be closed at 8:30pm half an hour before the show starts. Make sure you enter before then or you will not be able to get into the airport. We look forward to another fun-filled night celebrating our country's independence! If you have any questions, you can contact Steven or Ryan Cable in the Airport Office.

EAA Chapter 448 –June Events

VMC Club
Wednesday, June 11th
7 pm

**Question of the Month**

You've just taxied to the hold short line of the active runway after completing your runup and passenger safety briefing. What additional items should you now address as part of your pre-takeoff briefing?

(Keep reading for the answer below!)

Help us keep the Spirit of Aviation alive by joining us at our chapter events right here at Cable Airport in the EAA Chapter 448 clubhouse on the north side of the airport. In addition to our in-person events, we provide an online option for those who cannot make it in person. Everyone interested in aviation is welcome at our events.

Contact us at contact@eaachapter448.org to subscribe to our mailing list and receive meeting links and further information about our events.

Join us for this month's **Chapter Meeting and VMC Club** on **Wednesday, June 11th at 7 p.m.**

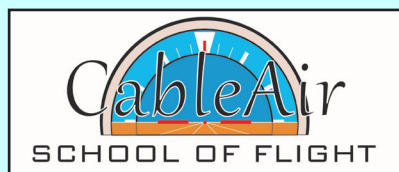

Question of the Month – Answer

The ACS for both Private and Commercial Pilot identify the following under Task F. Before Takeoff Check, Risk Management:

Potential powerplant failure during takeoff or other malfunction considering operational factors such as airplane characteristics, runway/takeoff path length, surface conditions, environmental conditions, and obstructions.

Many instructors, flight schools, and training organizations provide more detailed guidance for the pre-takeoff briefing. Such items often include:

- **Abort Point** – a point on the runway where, if not airborne (or at the proper speed), the takeoff should be aborted.
- **Decision altitudes** – altitudes at which flaps and gear should be retracted; altitude below which only a straight ahead emergency landing can be made; altitude at which a return to the airport (identify runways) can be considered.
- **Emergency Landing locations** – off-airport landing sites
- **Emergency procedures** – engine power loss or failure on the ground or in the air; procedures for fire on the ground or in the air.
