

IN LOVING
memory of

SAMUEL DAVID SCOTTI
JULY 25, 1986 - FEBRUARY 28, 2024

Gone west...

Sam Scotti

Sam Scotti

July 25th, 1986 – February 28th, 2024

Sam worked at Foothill Aircraft since 2012, he was a great employee and friend

He was well known around Cable Airport as the guy who could build, fix and always willing to help when asked. He will be missed everyday and will always be remembered as the hardest worker and the last one to leave!!!

On March 11th, 2024, Ryan Cable in partnership with DC Flight Simulation conducted a training session to help pilots learn the use of navigation by reference to VORs.

The session opened up opportunities for the students from Ryan's class to use the simulators as well as gain additional knowledge from what is

gained while attending the ground school and applying additional expertise provided by CFII Seth Guthrie and CFI Dallas Butler. Partnerships at Cable help create successful pilots and promote the aviation community which is a win for all.

Come Get Your Cable Hat and Shirt!!!

Come let everyone know you are part of a special club! Hats and T-shirts are now available in the Airport office. Stop by, grab some for your family and friends and show your support for the one of the greatest airports around.

EAA Chapter 448 – April Events

VMC Club
 Wednesday, April 10th
 7 pm

Question of the Month

When performing turns about a point, at which point in the maneuver is the bank at maximum value? (Keep reading for the answer below!)

Help us keep the Spirit of Aviation alive by joining us at our chapter events right here at Cable Airport in the EAA Chapter 448 clubhouse on the north side of the airport. In addition to our in-person events, we provide an on-line option for those who cannot make it in person. Everyone interested in aviation is welcome at our events.

Contact us at contact@eaachapter448.org to subscribe to our mailing list and receive meeting links and further information for our events.

Then join us for this month's **VMC Club** on **Wednesday, April 10th** at **7 pm**.

Question of the Month – Answer

While some pilots might intuit that the maximum bank would be when the crosswind component is greatest, this is not the case. To maintain the required circular geometry, the maximum bank (and maximum turn rate) is required when the ground-speed is highest, i.e., when the aircraft is at the downwind point of the maneuver.

Note: This is important to understand when flying the traffic pattern from base to final with a tailwind on base. If a pilot overshoots the turn to final, the tendency is to use extra rudder in an attempt to correct the overshoot. This results in an uncoordinated turn and a possible stall/spin scenario at low altitude.

LEADING EDGE AVIONICS

Leading Edge Avionics Closed

The Crew of Leading Edge Avionics Cable will be on vacation from April 6th to April 25th. If you need any service during that time, please contact support@leavionics.com or call 855-955-6151 or 714-955-6151. Thank you very much for your support this last year.

PRIVATE PILOT GROUND SCHOOL

WHEN: MAY 20, 2024

WHERE: CABLE AIRPORT

DURATION: 10 WEEKS, MON & WED EVENINGS

6:30PM – 8:30PM

INSTRUCTOR: RYAN CABLE

ENROLLMENT FEE: \$400

IF YOU ARE NEW TO AVIATION AND INTERESTED IN BECOMING A PILOT, OR NEED A REFRESHER ON AVIATION MATERIAL TO HELP BUILD YOUR SKILLS, PLEASE CONTACT RYAN CABLE AT 909-942-1725, OR BY EMAIL AT RCABLE85@GMAIL.COM.
