80th Deemed A Big Success, Thanks to All of You!!!

I want to extend a huge congratulations to the team and crew who coordinated our 80th-anniversary open house. On September 13th, Cable Airport celebrated 80 years of general aviation, and to commemorate this historic milestone, we decided to host a Fly-in.

As many of you know, Cable Airport has hosted numerous events over the years, including the annual airshow in January for over 40 years. While construction and other factors have prevented that event from recurring, our dedicated Foundation Committee, driven by a deep love for our airport community, successfully organized this celebration of our 80th anniversary.

We were delighted to invite local pilots from surrounding airports, car clubs, and community vendors to join us in celebrating Cable Airport. Thank you to everyone who attended, helped, and enjoyed this wonderful day with us.

Cable Airport Foundation Committee

DC Flight Simulation Hosts Open House During Cable Airport's 80th Anniversary

During Cable Airport's 80th anniversary celebration, DC Flight Simulation opened its doors to the public with an interactive open house event. Guests were invited to experience a 15-minute \$20.00 flight lesson in our state-of-the-art Redbird full-motion simulators, giving many their very first hands-on introduction to flying.

Owners Dylan and Chris personally operated the simulators throughout the day, sharing their knowledge and passion for aviation. Together, they conducted 34 flight lesson experiences, allowing attendees to take the controls and explore the excitement of flight in a safe, immersive environment. The event was a great success in showcasing DC Flight Simulation's commitment to making aviation accessible, educational, and inspiring for the community.

Civil Air Patrol Corner

Hello Cable Family and greetings from Squadron 25.

The past month was a busy one again for Cable Squadron 25. It started out with promotion night and we help kick off the celebration of cables 80th anniversary with the dedication of the cadet meeting room. It was dedicated to Dewey cable founder of the airport and the first squadron commander of what was originally the "baldy view squadron" later renamed cable composite squadron. The cadet meeting. Room is now the Col. Dewey Cable Cadet Meeting room. On Friday before the 80th anniversary celebration civil air patrol was called out on a ELT search in Riverside. This made for a long weekend as we were on site till midnight and then back at 6am for the celebration. Cap celebrated the anniversary with a huge turnout, our holder from Los alamos was brought in as well as a Cessna 172. Recruitment booth had a stem display including robotics and model rocketry. We assisted the CAF with ground marshaling on Friday and Saturday also.

Upcoming Events:

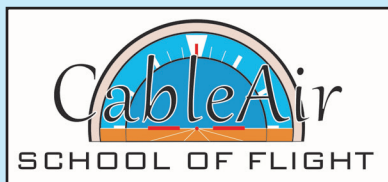

October 3-5 Huntington Beach Airshow

October 12 Girl Scouts Aerospace day

November 1 Cadet Orientation Flights

If you are interested in learning more about Civil Air Patrol please feel free to reach out to Lt. Dennis King at (626)367-4034

Congratulations to CableAir Members!!!!

Question of the Month

You're a non-instrument rated pilot, and have contacted ATC in an emergency situation and have been given vectors to an airport where you can make an emergency landing. What should you do if it appears the vector may take you into IMC?

(Keep reading for the answer below!)

Help us keep the Spirit of Aviation alive by joining us at our chapter events right here at Cable Airport in the EAA Chapter 448 clubhouse on the north side of the airport. In addition to our in-person events, we provide an online option for those who cannot make it in person. Everyone interested in aviation is welcome at our events.

Contact us at contact@eachapter448.org to subscribe to our mailing list and receive meeting links and further information about our events.

Join us for this month's **Chapter Meeting and VMC Club** on **Wednesday, October 8th at 7 p.m.**

Question of the Month – Answer

Pilots in such a situation should notify ATC that they are not instrument rated and the vector provided will take them into IMC. According to AIM 6-2-1.b, "Experience has shown that many pilots who are not qualified for instrument flight cannot maintain control of their aircraft when they encounter clouds or other reduced visibility conditions. In many cases, the controller will not know whether flight into instrument conditions will result from ATC instructions. To avoid possible hazards resulting from being vectored into IFR conditions, a pilot in difficulty should keep the controller advised of the current weather conditions being encountered and the weather along the course ahead and observe the following:

- 1. If a course of action is available that will permit flight and a safe landing in VFR weather conditions, noninstrument rated pilots should choose the VFR condition rather than requesting a vector or approach that will take them into IFR weather conditions; or**
- 2. If continued flight in VFR conditions is not possible, the noninstrument rated pilot should advise the controller and, indicating the lack of an instrument rating, declare a distress condition."**

NOTE: According to the AIM, if a distress condition is declared, Search and Rescue coordinators will take steps to intercept and escort an aircraft. The pilot has discretion to not accept the intercept and escort services.
